Performance data source: LGIM. All performance periods over a year will be annualised. Returns are calculated on the basis of daily midday mid-market prices. Fund performance is shown net, which is after the deduction of the management fees applicable to your scheme. Please refer to your scheme literature, or to your scheme administrator for the fee rate that applies to your scheme.

Please note that the Fund moved on to the LGIM DC Platform with effect from February 2020. This involved a move from end of day pricing to a midday pricing point. The performance figures shown on this fact sheet represent the chain-linked performance of the Fund either side of this date.

**Past performance is not a guide to the future. The value of an investment is not guaranteed and can go down as well as up. Exchange rate variations can cause the value of overseas investments to increase or decrease. You may not get back the amount you originally invested. For overseas markets the figures are sterling adjusted and net of any withholding tax.**

An adjustment was made to Net Asset Value (NAV) of the fund in Q2 2024 to remove a proportion of the withholding tax accruals. The majority of these related to dividends in respect of Swiss and Belgian holdings along with certain other European countries where PMC believes there is significant risk to recovery in the near term. As a result of this, the fund may deviate from its benchmark this quarter which may also be observable in longer performance periods spanning this adjustment.
